

DESCRIPTION**A-MOE, A-169 – Mill Out Extension**

The A-MOE, provides a means for extending the bore of a Seal Bore packer, so as to accommodate the Packer Milling Tool.

A mill-out extension runs below a seal bore extension of seal bore packers. The mill-out extension catches sleeve of the packer milling tool during milling of permanent packers. In the case of a retrievable seal bore packer it catches the sleeve of the retrieving tool.

FEATURES

- Compatible with the Packer Milling Tool.

BENEFITS

- Available in 5' and 10' configurations. (other lengths available as per requirement)

APPLICATIONS

- High Flow Production wells.
- High Pressure and Temperature applications.

Available in different sizes corresponding seal bore packers with standard or exotic material based on compatibility with the well environment and application, to meet customer's requirements.
