

DESCRIPTION

A-PTRSB, A-229 – Pulling Tool for Retrievable Seal Bore Packer

The A-PTRSB is designed to retrieve the A-RSBP Seal Bore Packers from wellbores. The tool latches with the top of the packer and an upward force shears an inner sleeve, continued up-strain spaces out the external components, retracts the slips, relaxes the Packing Element and the packer can now be pulled out.

FEATURES

- No-rotation required to latch with the packer
- Retrieves with straight upward motion

BENEFITS

- Emergency rotational release
- Robust construction

APPLICATIONS

- Retrieval of Seal Bore packers
